

AI Precision Prompt Pack

Use verbatim first, personalize after you know the baseline. Paste generous context. Always edit before forwarding, you are the judge.

Decompose

"Here is a goal and its context: [paste]. Break it into milestones, workstreams, and next physical actions with suggested owners. Include reviews, approvals, coordination, and cleanup tasks."

Checklist

"I am shipping this deliverable: [describe]. Generate a completeness pre-flight checklist covering content, recipients, and logistics. Flag the items most commonly missed."

Gap review

"Review this draft/plan: [paste]. List what is missing or underdeveloped, ranked by consequence. Do not summarize what is present."

Edge cases

"Here is a plan: [paste]. List the boundary conditions and failure modes to consider: volume, ownership, time pressure, odd inputs, rollback."

Definition of done

"For this piece of work: [describe], draft three to five objective, checkable completion criteria and a suggested not-included line."

The editing rule

AI output is a strong first pass that will state wrong things confidently. Cut what does not apply, verify what matters, and send nothing raw.
