SUPPORTS TERTIARY HOW

FOR WHY-WHAT · WHAT-WHY

The HOW-Partner Review Protocol

A structured way to request a precision review from a HOW-primary colleague. **The right partner completes the work**, and the protocol makes asking cheap for you and answering easy for them.

THE DRAIN

Tertiary HOW profiles often avoid asking for precision reviews: the request feels like exposing a gap, and unstructured asks ("can you look this over?") produce either shallow glances or overwhelming teardowns. So the review that would have caught the problem never happens.

WHAT THIS TOOL DOES

The protocol reframes the exchange as designed collaboration, which is exactly what the framework says it is: a structural partnership need, not a favor. A five-line request template tells the reviewer what the work is, what stage it is at, and where to aim, so their precision energy lands where it matters.

The five-line request

- | | |
|-----------------------|---|
| 1 What this is | One sentence on the deliverable and who it is for. |
| 2 What stage it's at | Draft, near-final, or shipping tomorrow. Calibrates depth. |
| 3 What kind of review | Completeness, edge cases, feasibility, or numbers. Pick one or two. |
| 4 Where to push | The area you are least sure of. Aim their energy. |
| 5 When it's needed | A real deadline, with enough runway to act on findings. |

HOW TO USE IT

- 1 **Identify your reviewers in advance.** Two or three HOW-primaries whose review energizes them. This is a trade, not a burden.
- 2 **Send the template, not the ask.** Five lines. Vague requests get vague reviews.
- 3 **Receive findings as findings.** Precision feedback is about the work. Thank the thoroughness; it cost them nothing and saved you plenty.
- 4 **Reciprocate in your primary.** Offer purpose framing or momentum help back. The trade is what makes it durable.

WHAT IT WON'T DO

A review protocol cannot fix work sent too late to change. Build the review into the timeline, not after it. And this is a requirement for high-stakes work, not a nice-to-have; the framework is explicit that partnership needs are structural.
