

CAPABILITIES OVERVIEW

What MindPrint™ does for your business

An assessment, a platform of AI tools, and hands-on consulting that put the way your people solve problems to work.

Most friction at work isn't personal. It's predictable.

When work stalls, it rarely looks like a thinking problem. It looks like a missed handoff, a meeting that reopens a decision everyone thought was made, or a capable person quietly running on empty. The cause is usually the same: people are wired to solve problems differently, and nobody can see it. **MindPrint™ makes it visible.** A 10-minute assessment shows where each person's energy comes from when the work gets hard, and where it drains away. The Curio platform then turns that into tools your team uses on real work.

MindPrint™ is not a personality assessment and doesn't measure ability. It maps cognitive orientation: how a person naturally approaches a problem when the pressure is on.

THE FRAMEWORK

WHY — Purpose-Driven

PURPOSE · VISION · MEANING

Energized by meaning and the question that reframes everything. Needs to know why something matters before committing to how.

WHAT — Progress-Driven

MOMENTUM · ACTION · PROGRESS

Energized by movement and forward progress. Clarity comes through action, and an open destination doesn't slow them down.

HOW — Precision-Driven

DEPTH · SYSTEMS · PRECISION

Energized by complexity and making things work completely. Needs to understand how the parts fit before moving.

Everyone uses all three, in their own ranked order

1

Primary

Energizing, where best thinking happens

→

2

Secondary

Functional, capable and directs primary

→

3

Tertiary

Draining, a real cost to plan around

The model is about energy, not ability: skills in all three can be learned.

WHO IT HELPS

Individuals

- See what energizes and drains them
- Get support for draining work
- Communicate so others hear it
- Choose roles and next moves that fit

Teams and managers

- See what the team's mix may miss
- Name friction for what it is
- Pair the right people on the right work
- Run meetings that use everyone

Organizations

- One shared language across teams
- Onboarding built around each hire
- Clearer roles and talent conversations
- One license, with the tools you choose

HOW IT WORKS

1

Assess

Everyone answers 23 quick questions, about 7 to 10 minutes. Send links one at a time or to a whole team.

2

Understand

Each person gets a MindPrint™ Profile, a Communication Field Guide, and an AI & Delegation Guide for the work that drains them.

3

Apply

Your license opens the Curio platform: AI Companions, an Orientation Translator, role and career tools, and a 43-resource library.

4

Align

Managers get team views and tools to design sessions, meetings, and onboarding. Curio consultants can facilitate alongside you.

TWO WAYS TO WORK WITH CURIO**License the platform**

Your people take the assessment and use the tools on their own, every day. You choose which tools to turn on.

Add Curio consulting

We launch MindPrint™ with your teams, facilitate working sessions, and help leaders apply it to a specific challenge.

Where MindPrint™ helps the business

Team effectiveness

Name recurring friction for what it is, orientation and timing, not personality, and set up the pairings that complete each other.

- Team Canvas and Friction Spotter
- Collaboration pairings
- Blind Spot Report

Meetings and workshops

Sequence sessions so purpose, action, and precision each get their moment, and fix meetings that run long or go nowhere.

- Session Architect agendas
- Meeting Architect redesigns
- Printable facilitation materials

Onboarding

Give managers and new hires a shared plan for the first 90 days, built around how the new person is wired.

- Manager Integration Guide
- New Hire Brief
- 30/60/90-day check-ins

Leadership and management

Help leaders see where they do their best thinking, where they need a partner, and how to lead people wired differently.

- 1:1 and performance conversations
- Where to lean in, where to get help
- Team-wide profile views

Communication

Close the gap between what was said and what was heard, across WHY, WHAT, and HOW readers.

- Orientation Translator
- Communication Field Guides
- Shared team language

Roles and talent

Understand what a role demands and how it fits a person, for role design, internal moves, and career conversations.

- Role Alignment Analyzer
- Job Description Analyzer
- Career Guidance reports

AI adoption and delegation

Point AI and teammates at the work that drains each person, so their energy goes where they think best.

- AI & Delegation Guide
- AI Companions
- Task classifier

Coaching and development

Ground coaching in energy, not deficits: support for draining work without asking anyone to become someone else.

- Tertiary Support Library
- Weekly profile tips
- Profile-specific resources

WORKS ALONGSIDE WHAT YOU ALREADY USE

MindPrint™ doesn't replace DiSC, CliftonStrengths, or MBTI. It answers the question those tools don't: how does this person think when the problem is hard and the stakes are real? DiSC tells you how someone communicates in a meeting. MindPrint™ tells you whether they'll challenge the premise of the meeting or drive it to a next step. Most assessments end with a report. MindPrint™ starts there: the profile powers tools your people use every week.

QUESTIONS WORTH ASKING

- ? Which decisions does your team keep reopening?
- ? Who on your team is quietly doing work that drains them?
- ? Which meeting would you redesign first?

Ready to see how your team is wired?

Book a 30-minute conversation. We'll show you the platform and map where a license, consulting, or both fit.

Everything in the Curio platform

This is what a license includes. Every tool reads from the same MindPrint™ framework, so a person's profile shows up consistently wherever they work, and each organization chooses which tools its people use.

FOR EVERY INDIVIDUAL

Put a person's own profile to work.

MindPrint™ Profile

Primary, secondary, and tertiary orientation; what energizes and drains them; how to work with them; natural collaborators; roles where they excel. Downloadable as a full PDF.

AI & Delegation Guide

For each kind of draining task: utilize AI, delegate it, or collaborate, with a resource for each. Premium accounts can classify any task they describe.

Orientation Translator

Rewrites a message for a WHY, WHAT, or HOW reader, or for a specific person's profile, with notes on what changed and why.

Communication Field Guide

How their wiring shows up in writing, how WHY, WHAT, and HOW readers hear it, and the adjustments that buy the most understanding.

AI Companions

Three AI assistants, Precision, Purpose, and Progress, that draft the kind of work that drains a person, so they can spend their energy reviewing and deciding.

Weekly profile tips

A short, practical tip each Monday, specific to the person's own profile, working through a 20-tip sequence.

FOR TEAMS AND MANAGERS

Turn individual profiles into how the team works.

Team Dynamics

Built from the real roster: Team Canvas, Problem Match, Friction Spotter, Energy Map, Collaboration pairings for a task, and a Blind Spot Report.

Meeting Architect

Redesigns recurring meetings, from 1:1s and status meetings to leadership updates and all-hands, around goals, current challenges, and the people in the room.

Session Architect

Designs brainstorm, decision sessions, kickoffs, and retros sequenced through WHY, WHAT, and HOW, with timed agendas, breakout groups, and printable materials.

Onboarding Resources

A Manager Integration Guide and a New Hire Brief for each profile: Day 1, Week 1, and 30/60/90-day check-ins.

FOR ROLES AND CAREERS

Match the work to how people are wired.

Role Alignment Analyzer

Enter any role and get an alignment score, what will energize and drain, and collaboration recommendations for a profile.

Career Guidance Tool

A personalized report with best-fit roles, energizers, challenges, and strategies. Can fold in results from DiSC, CliftonStrengths, or MBTI.

Job Description Analyzer

Paste a job description to see its cognitive demand breakdown and how all six profiles line up against it.

RESOURCES AND PLATFORM

Support at the moment it's needed.

Tertiary Support Library

43 practical tools and templates for the work that drains each person (their tertiary orientation), plus a collection for teams.

Insights

Curio's articles on talent, teams, and what it means to think differently, available right inside the platform.

Curio Assistant

Describe what you're working on and it points you to the right tool or resource, answering only from Curio's MindPrint™ materials.

Team administration

Send assessment links in batches, team analytics, owner, manager, and member roles, and teams with manager-scoped views.
