

Decomposition Cascade

Work top to bottom, one level at a time. Everything below must trace back to the goal above it. Transfer the task level into your tracking tool the same day.

GOAL

LEVEL 2 · MILESTONES

Three to five checkpoints that would prove the work is on track.

--	--	--	--

LEVEL 3 · WORKSTREAMS

The threads of work that must run under each milestone above.

--	--	--	--

LEVEL 4 · TASKS

Next physical actions per workstream above, each with one owner.

--	--	--	--	--

Before you transfer Level 4 to your tracking tool: does it account for reviews, approvals, coordination, and cleanup, not just the visible work?
