

Effort Estimate Builder

Never estimate from the shape of the work. Build the number from tasks and history, then present the corrected figure first.

EVERY TASK, SIZED (FROM YOUR DECOMPOSITION CASCADE)

TASK	SIZE (SMALL / HALF-DAY / FULL-DAY)
Reviews (invisible work, size it, never zero)	
Revisions	
Approvals	
Coordination	
Cleanup	

THE HISTORY COMPARISON AND THE CORRECTED NUMBER

FIELD	VALUE
One comparable past project	
What it was estimated at	
What it actually took	
The multiplier this shows	
The defensible total for this project	

Persistent across projects. Add one row every time a project closes. The multiplier only sharpens with history.
