FOR WHY-HOW · HOW-WHY

The Version 0.5 Reframe

A mental model and a vocabulary for shipping imperfect work as data collection. **The early release becomes a method of understanding**, which is the register this wiring can genuinely accept.

THE DRAIN

"Just ship it" is advice built for a different wiring. For WHY-HOW and HOW-WHY profiles, releasing incomplete work feels like publishing an error, and no amount of pressure changes that feeling. The drain is not the work; it is the exposure of the unfinished.

WHAT THIS TOOL DOES

The reframe routes shipping through what already energizes you: understanding. A version 0.5 is not a flawed product, it is an instrument for gathering the one kind of information analysis cannot produce, contact with reality. Framed as data collection, early release becomes intellectually defensible, then habitual.

The reframes

- 1 A draft is an instrument for collecting data you cannot get any other way.
- 2 Feedback on a rough version is cheaper than polish on the wrong version.
- 3 Shipped and imperfect beats complete and invisible; invisible work teaches nothing.
- 4 The system improves through contact with reality, not through further contemplation of it.
- 5 Labeling it v0.5 tells every reader the precision standard it should be held to.

HOW TO USE IT

- 1 **Label the version explicitly.** "v0.5, for direction not polish" sets the reader's bar and protects your standard.
- 2 **Ask one specific question with it.** "Is the structure right?" turns the release into an experiment with a hypothesis.
- 3 **Log what the feedback taught you.** The log is the proof, in your own evidence, that early release produces understanding.
- 4 **Raise the version, not the delay.** 0.5 to 0.8 to done, each on feedback. Iteration is the precision path to quality.

WHAT IT WON'T DO

The reframe does not apply everywhere; some work genuinely must be right the first time, and your instinct for which is which is trustworthy. It also will not eliminate the discomfort of exposure. It gives the discomfort a purpose your wiring respects.
