

WIP Inventory & Parking Lot

Count like an auditor first: every open thread, honestly. Then cap active work at three. A new thread requires a finished one or a formally parked one.

Active

CAPPED AT 3

Chosen by receiver value, not interestingness.
Whose waiting is most expensive?

Parking Lot

Each entry needs a one-line written state. A park with no state is a dropped thread with better branding.

Closed / Retired

Monthly review: every parked item gets a slot or gets retired, on purpose.
