FINDINGS, ANY QUESTION THAT COULD NOT BE ANSWERED, ESCALATED TODAY

Facilitator Script

Ask in order, why first. A blank answer is the project's first risk.

"Why does this matter, and to whom?"

Purpose in two sentences, from the sponsor's mouth if possible.

"What does progress look like in two weeks?"

The first visible milestone and who is watching for it.

"How will the work actually get done?"

People, sequence, dependencies, the first three tasks.

A blank answer is a finding, not a gap to fill in later.

Escalate it in writing, today.

Who owns noticing when each answer stops being true?

Assign a keeper per question before closing.
