

The Handoff Contract

Fill it in together, live, at the moment of handoff. The receiver writes line two, the sender cannot know what they habitually omit.

TORN OFF, BOTH SIGNERS KEEP A COPY

What I'm handing you

The work, its state, and its purpose, three sentences from the sender.

What you need that I wouldn't think to include

The receiver's line, from their wiring: the mechanism, the deadline, the why.

What done means

Checkable criteria, agreed now, not discovered at delivery.

When we check back

One midpoint touch, dated, before done is due.

SENDER

RECEIVER

Wiring-Gap Examples by Pairing

Read before the live session. What each sender wiring typically omits, by receiver.

SENDER ORIENTATION	RECEIVER ORIENTATION	WHAT TYPICALLY GETS DROPPED
WHY	HOW	The mechanism. Inspiration handed over, called a plan.
HOW	WHY	The reason. Completeness handed over, called clarity.
WHAT	HOW	The deadline logic. Urgency handed over, called a brief.

One month, every cross-orientation handoff. After a month the questions become reflex and the paper becomes optional.
